Mr. ....  
European Parliament  
Rue Wiertz  
Altiero Spinelli 07H246  
1047 Brussels

Warsaw, 08.01.2015

Dear Member of the European Parliament,

As a polish citizen I kindly ask you to judge about the situation in Poland in a planned European Parliament debate basing on facts and not on opinions, which may appear as facts and which could be expressed by people, which may appear as trustworthy. To make it possible let me point your attention to the following:

1. The main private TV media (TVN) was created and is still owned by people responsible for anti-polish communist propaganda during the Martial Law, which was called to destroy the Solidarity movement in 80-ties (Mr. Mariusz Walter and Mr. Jan Wejchert ) or their children. Communist media traditionally call polish people fascists repeating absurd judgments of Russian occupator, which invaded Poland at the end of the WW II. A lot of polish patriots fighting in the underground against Hitler was killed after calling them fascists, because Stalin declared his invasion in Poland and conquering it as a fight against fascism. Courts in Poland still prevent to fully uncover their graves, as the places were ofter unknown to their families.

2. The main newspaper Gazeta Wyborcza is governed by Mr Adam Michnik, whose brother was a stalinist judge, who issued many death sentences against polish patriots in 40-ies and 50-ties. Mr. Adam Michniks' father was a communist agent sentenced on propaganda before WW II. Mr. Adam Michnik calling himself a Solidarity supporter always protected the creators of Martial Law 1980 Mr. Jaruzelski and his colleagues. Gazeta Wyborcza is still calling polish people fascists, so that even disorientated leftist activists invited from Berlin assaulted in the streets of Warsaw actors in historical show remembering gaining of independence of Poland in 1918. They where sure they fight again fascism in Poland ! Yet there has never been a fascist movement in Poland.

3. During the former government of Mr. Tusk the majority of journalists were thrown away from the state television and radio which resulted in a situation that the "polish" state media even did not mention in their news a many hundred thousand demonstration which took place in the streets of our capital at the same time remembering Poland gaining independence in 1918 just because these marches were organized not by the communists.

4. Important daily press Fakt.pl and newsweek.pl are divisions of german gutter press the Bild-Zeitung and their journalists (Mr. Tomasz Lis) cry in the streets of Warsaw calling to resistance against polish government. The vast majority of color press in Poland is owned by Germans, which try to suggest that not Germans, but rather so called "fascists" are responsible for mass killing of Judges during the WW II and among fascists were polish people fighting against Hitler in the underground as well !

5. No proper legal settlement of communists in Poland ever took place, "polish" courts did not succeed to sentence people responsible for Martial Law, which crashed the Solidarity movement in 1980-s and the Constitutional Tribunal stopped the law issued by the parliament which obliged all people engaged by the state to openly declare if they were disloyal to polish society working for soviet occupant secret service or no.

6. "Polish" courts prevented also publishing of the rest of files of "polish" secret service, which worked with soviet occupator together and whose' people are still in loyalty to the soviet occupator. The so called reserved collection of many thousands of files , which refers people still occupying main positions in "polish" state is still secrecy. The majority of about 90 % of files of "polish" secret service were destroyed in early 90-ties and flashcards of them made before the destruction has been transferred by "polish" general Buła to Moscow.

7. The "polish" Constitutional Tribunal rejected to judge about important issues among them the question of restitution of property stolen by communists. Still thousands of real estate properties in Warsaw, which obey to the stalinist so called Bierut Decree cannot be returned to their owners. A warsaw administration led by Mrs. Hanna Gronkiewicz-Walczak - a vice in the PO party ruling over Poland during last eight years is simply ignoring hundreds of final judgments made by the Administration Courts. Nevertheless judges of these courts openly declare in the sentence explanation justifying mild judgments: "there'll possibly be better in the next years, when the warsaw administration has more money" exposing thus their degenerated understanding of law and of private property.

8. In the former Parliament the strong fraction was still build by

the members of PZPR (a former communist party) which ruled over Poland with soviet support from 1944 to 1989 yet the membership to this party could hardly be found in their official biographies or presentations before elections and is still not publicly know unlike the NSDAP membership of election candidates in Germany. The polish courts prevented also generally the publication of names of people sentenced in criminal cases arguing this could violence their human rights.

9. Against the opinion of over 50 professors, specialists in the subject they refer the former Prime Minister Mr. Donald Tusk supported the explanation of the airplane crash, in which nearly hundred important people of political life among them the President of polish state were killed, as an accident caused by an inexperienced pilot, who could not fly properly and hit the birch-tree. The commission called by Mr.Tusk published such statement, which it calls a report without the black-boxes, without an airplane wrack, without the recording of air traffic control tower and without over 50 other crucial documents, which Russia rejected to provide. Immediately after the crash Mr. Tusk agreed about the cooperation with Mr. Putin about the proper investigation for which Mr. Putin made himself personally co-responsible. Mr.Tusk rejected also any proposed US-help which could provide satellite photos of a crash and 2014 he was given with german help an office of a President of the European Council and thus left Poland.

10. Not only is Mr. Macierewicz, who organized important resistance against communist occupation in early 70-ties and 2005 resolved as a minister the military secret service supported by Russia, but also the former Prime Minister and party leader Mr. Kaczyński, Mr. Mariusz Kamiński, who led the state special agency investigating high-level corruptions CBA, thrown away from this office by Mr.Tusk, which no court in Poland found itself competent to judge that is was unlawful and also many other supporters of reforms in Poland are accused of being fascists, racists, religious fanatics and generally crazy people spreading hatred. The transfer of power to them even if decided in election is called highly anti-democratic simply because these people are defined by main media as ant-democrats.

Dear Member of the European Parliament,

in accordance with the beginning of this letter I kindly ask you not to rely on my presentation given above. I might be wrong in details, which could be not details for others. I urge you to verify at least one of these points with your own means.

best regards
